Hi John,

RE: Jim Gay Mine M/49/0005

Thanks for your time on site last week. I have had a chance to compile the shape files and compare our data. I calculated 76 acres of disturbance, you calculated 75....pretty darn close, so I think we did well. The east area of your permit we considered the "revegetation only" portion adjacent to Redwood Road calculates out to 13 acres. Be advised, because we are adding an additional 26 + 13 acres to your 50-acre permit, this will be a large increase to the bond amount. I have written a Division Directive outlining the new calculation with the required due date to get the bond in to us. The permit itself will need to be amended to show that the mine is at 89 acres now, as opposed to 50. You will have to submit the amendment paperwork to make this change. Here's a link to the form:

https://fs.ogm.utah.gov/PUB/MINES/Minerals_Related/FORMS/MR-REV.pdf

Look for that letter in the next few weeks and if you have any questions, feel free to give me a call.

April

Hi April,

Here is a shapefile that covers the gps tracks we did yesterday – the one from our Ashtech unit. There also is a shapefile of what I have been using for several years. This was made by a Garmin Etrex that recorded a lot less points. Since

there were those regions where I was diverging from you my acreage from yesterday was quite a bit less than my older estimate.

I really like your idea of making sub-regions of areas we are finished with and that just need vegetation. If you want me to draw up my version of a total map with sub-regions, etc. I can do it and get it to you.

Thanks,

John
